

## WINTERTIME

In wintertime FRCertified curtains reduce heat loss and heating costs.

The Heat-transfer factor when hanging FRCertified curtains can be calculated according to the norm NBN EN ISO 10077-1 (2006).

$U_{ws}$  heat-transfer factor after hanging the FRCertified curtain  
 $U$  heat transfer factor before hanging the FRCertified curtain  
 $DR$  the additional heat resistance due to the FRCertified curtain calculated according norm NBN EN 13125

### RESULTS OF MEASUREMENTS:

  $U$  ( $W/m^2K$ )

  $DR$  ( $m^2K/W$ )

  $U_{ws}$  ( $W/m^2K$ )
